4 CHEESES

€ 16,00

8 CHEESES

€ 32,00

JULIETTE

A semi-soft goat cheese with an orange blush, created during a cheese refiners collab. After Frederic had been thinking about it for quite some time, Van Tricht and cheese factory Karditsel had this luminous idea of adding colour to the cheese with Annatto (derived from the red seed of the South American achiote tree). The cheese itself is made in Limburg from raw biological goat's milk. Its taste is delicate, the texture smooth and creamy. A tribute to Juliette, Frederic's grandmother who founded the business in 1970.

BRILLAT-SAVARIN

Triple cream cheese of raw cow's milk from Île-de-France. The paste is sweet-and-soft and pleasantly tasteful. Cream is added to the milk to make it extra thick, and so the cheese comes out rich and buttery. It is produced in Seine-et-Marne, a department in which you'll find both the countryside and the Parisian banlieues. A region that is also the home of Brie de Meaux and Brie de Melun. This particular cheese saw the light of day, not too long ago, somewhere in the 30's, and is named after a famous French foodie.

CAMEMBERT 3 LATTI

Italian-style camembert. Made from three types of pasteurized milk: cow's, goat's and sheep's. Exquisite taste and texture, from a small production in the Piemonte region.

ALEX

This Alex is a semi-hard cheese from the Allgäu region in southern Germany. Think of a typical mountain cheese, flooded with taste after 9 months of ripening. The rind is covered in a mixture of cinder and elderflower syrup. While the cheese refiner, his very first cheese creation in hand, was on his way to a shop in Munich to present it, there was still no name for it. In the end, he named the cheese after the train that got him there: the Allgäu Express, or in short, Alex.

BOOKERS VINTAGE

A celebration of the Irish Cheddar cheese from Cork. This large block of cheese, think 20 kg, is cut into four pieces, after which each of them matures separately. This, to create a more profound complexity. Made from microbial rennet, from raw milk. Aged for 18 months.

BURONOIX

French cheese, type Murot, from pasteurized cow's milk. The cheese is refined in cellars and washed in nut liqueur, and it has gone through a ripening process of minimum 3 weeks.

HERVE LINGOT

From the cheese refinery Le Vieux Moulin in Herve. This is the only Belgian AOP cheese and the only raw milk Herve to be found. Tangy in taste and with a rind that is washed multiple times in briny water.

BIO BLEU FUMÉ

The Bio Bleu was created upon the request of cheese refiners Van Tricht as the Pas De Bleu's little brother. It is a quirky blue cheese, based on biological raw cow's milk. This cheese is made by the cooperative cheese factory Het Hinkelspel in Sleidinge, East Flanders. Several farmers in Flanders Fields provided the milk for it. The cheese has a 6 to 8 weeks ripening time, after which it is naturally smoked for 4 hours at low temperature, on beech and oakwood.
